CentOS High Availability Leverage the power of high availability clusters on CentOS Linux, the enterprise-class, open source operating system Mitja Resman BIRMINGHAM - ...

Red Hat Enterprise Linux 7

The High Availability Add-On is an integrated set of software components that can be deployed in a variety of configurations to suit your needs for performance, high availability, load balancing, scalability, file sharing, and economy The High Availability Add-On consists of the following major components:

Plexxi Control High Availability: Installation, Upgrade ...

7 Plexxi Control High Availability: Installation, Upgrade and Administration Guide, 400 HA Clustering Software Plexxi utilizes the CentOS cluster software stack to provide its high availability solution for Plexxi Control and Postgres The CentOS cluster software stack's main components include Pacemaker which is

Clusters from Scratch Pacemaker 1

This document provides a step-by-step guide to building a simple high-availability cluster using Pacemaker. The example cluster will use: 1 CentOS 7.5 as the host operating system, 2 Corosync to provide messaging and membership services, 3 Pacemaker 1.1.8, 4 DRBD as a cost-effective alternative to shared storage, 5

Red Hat High Availability vs. Steeleye Protection Suite ...

Red Hat High Availability vs Steeleye Protection Suite for Linux Overview 1 Red Hat High Availability vs Steeleye Protection Suite for Linux A Competitive Analysis - August 2012 Overview Red Hat Enterprise Linux 6.3 (RHEL) was released on June 21, 2012 The High Availability solution for **High Availability with PostgreSQL and Pacemaker**

High Availability? • Stay On-line • Survive Hardware Failures • No Transaction Loss High availability means a lot of things, but the primary meaning is contained within the name. Keeping a database available at all times can be a rough challenge, and for certain environments, redundancy is a must. Two of everything is the order of the day.

Automating High Availability (HA) Services with VMware HA

high-availability solutions that are both easy to use and easy to configure. This white paper provides an architectural and conceptual overview of VMware HA and describes how you can use HA to provide high availability for any applications running in virtual machines at lower cost than would be possible with static, physical infrastructure.

SAP NetWeaver High Availability Cluster 7.40 - Setup Guide

Set up a Linux high availability platform and perform a basic SAP NetWeaver installation including SAP Enqueue Replication Server on SUSE Linux Enterprise. Integrate the high availability cluster with the SAP control framework via `sap_suse_cluster_connector`, as certified by SAP. This guide focuses on the high availability of the central services.

High Availability and Disaster Recovery Options for SAP ...

HANA System Replication (HSR) is a high availability and disaster recovery solution provided by SAP. HSR follows the “N+N” approach, where you configure the same number of nodes for both the primary and the secondary system. Each service in the primary system communicates with its counterpart in the secondary system to replicate the data.

Arcserve® Replication and High Availability

Though high availability is built in to Microsoft cluster environments, shared storage could still be a single point of failure. Arcserve RHA protects cluster storage, allowing you to replicate data to a disk resource on or off-premises.

Microsoft Azure and SUSE High Availability

- High Availability protects data before the service
- Clusters are more complex than single nodes
- Clustering broken applications will not fix them
- Invest in training, processes, knowledge sharing
- Get expert help for the initial setup, and
- Thoroughly test the cluster regularly
- ...

Red Hat Enterprise Linux 7

This section lists features of the Red Hat High Availability Add-On that are new since the initial release of Red Hat Enterprise Linux 7.1.1. New and Changed Features for Red Hat Enterprise Linux 7.1. Red Hat Enterprise Linux 7.1 includes the following documentation and feature updates and changes.
